

## SE Series Selection Sheet

The SE series cable glands are made in plastic with a white or grey finish for applications in all hazardous industries and environments that require the IP68 level of protection for cable entry. All SE glands are supplied with A4 stainless fitting screws and come with clear fitting instructions.

### Specification:

- Material - UV stabilized white nylon, UV stabilized grey nylon.
- Rating – IP 68
- Compression seal technology
- Cable sizes 2mm – 47mm

| Index Ref. | Material      | Pre-drilled | Undrilled | Cable Size | Max Cable Size | Max Connector size | Dia x Height |
|------------|---------------|-------------|-----------|------------|----------------|--------------------|--------------|
| SE1        | Plastic       | X           |           | 2-7mm      | 7mm            | -                  | 55x16mm      |
| SE1W       | White Plastic | X           |           | 2-7mm      | 7mm            | -                  | 55x16mm      |
| SE5        | Plastic       | X           |           | 7-9mm      | 9mm            | -                  | 82x24mm      |
| SE5W       | White Plastic | X           |           | 7-9mm      | 9mm            | -                  | 82x24mm      |
| SE6        | Plastic       | X           |           | 10-12mm    | 12mm           | 21mm               | 82x24mm      |
| SE6W       | White Plastic | X           |           | 10-12mm    | 12mm           | 21mm               | 82x24mm      |
| SE7        | Plastic       | X           |           | 2x 3-6mm   | 2x 5.5mm       | 21mm               | 82x24mm      |
| SE7W       | White Plastic | X           |           | 2x 3-6mm   | 2x 5.5mm       | 21mm               | 82x24mm      |

Designed for the Marine industry – IP68 for all applications
