VMH 14

NEW GENERATION, NEW HORIZONS – THE VMH SERIES

KEY FEATURES

- ▶ VMH look-and-feel
- ▶ Digital display with visual bar graph
- ▶ EasyLink interface
- ▶ Configurable with smartphone via Airwave ready
- ▶ Trim, Voltmeter, Fuel Level, Water Temperature, Transmission Oil Temperature and Pressure, Engine Oil Temperature and Pressure

The VMH display line is the premium class of dashboard instruments designed to perfectly fit into the most modern cockpit concepts.

The elegant look of their optically bonded black glass display makes them the perfect match with your stylish dash. Powered by the latest technology microprocessors, the VMH displays have no fear of managing the most demanding applications.

Every VMH Master can control up to 16 VMH 14 satellites, and the installation cannot be easier with the Veratron well-known daisy chain concept.

When combined with a VMH Master device the instrument will display the data in a bright and digital form thanks to its sun-readable color display with outstanding outdoor performances. The colored bar graph and the alarm display allow you to visually understand your data.

One single device can be used for displaying 8 different types of data. With the AirWave contactless configuration, you can set up your VMH 14 with a simple tap of your NFC-capable smartphone. Define the datatype which to display, the limits of the bar graph and alarm thresholds with the dedicated VMH 14 configurator app.
